Computer Information Systems
STUDENT LEARNING OUTCOMES

The graduate of this program will be able to:

1. Research and plan for "real world" applications involving networking, programming, visual communications, and security.

2. Determine and implement a solution to an encountered problem dealing with networking, programming, visual communications, and/or security.

3. Present a team solution to a group.

4. Complete a checklist of necessary skills within a student's field of study (networking, programming, visual communications, security).

5. Demonstrate punctuality and attendance as related to the attendance policy.

6. Demonstrate the ability to work as a member of a team.

7. Demonstrate integrity as related to the policy on cheating and professional conduct.

8. Communicate in a professional manner.

9. Follow written and verbal instruction.

10. Document accurately and clearly.

11. Stay current with changing technology.
