TECHNICAL COLLEGE

## Community Health Worker STUDENT LEARNING OUTCOMES

The graduate of this program will be able to:

1. Bridge the gap between communities and health and social service systems by aiding in communication between provider and client.
2. Navigate health and human services systems, making referrals and coordinating services to facilitate the continuity of care.
3. Advocate for individual client and community needs, acting as a spokesperson for the client unable to speak for themselves.
4. Educate and build capacity for the individual and community in accessing health and human services systems while emphasizing healthy lifestyles and personal responsibility for clients to achieve their health goals.
5. Provide direct services through education on disease prevention, organizing health/wellness events and/or facilitating support groups, and conducting health screenings.
