

Purchase a Laptop in the Lake Area Tech STAX Bookstore

LAPTOP INFORMATION

Making laptops available at all times and having the ability to utilize the latest software in the program of study is extremely important to the success of our students. The Lake Area Tech Stax Bookstore has laptops available for students to purchase. The cost of the laptops vary based on program specifications.

Warranty

A three-year warranty coverage is included in the purchase that covers parts and labor. A three-year Accidental Damage Protection (ADP) warranty is also included in the purchase, based on the manufacturer's protection policy.

Service Desk

Professionally trained individuals are available at the Service Desk to assist with problems, questions, or minor repairs encountered with laptops. The Service Desk is located in the IT Department.

Want a Laptop, But Not Required?

If you are a student enrolled in any program at Lake Area Tech and would like to purchase a laptop, you may do so by contacting the Stax Bookstore. Laptops can be purchased based on models available.

Other Information

- **Stolen Laptops** A stolen laptop will be treated as a criminal offense and should be reported to the IT Department immediately. The IT Department will be able to provide local law enforcement with serial numbers and models. Students will be required to complete a theft report with the Watertown Police Department. Students are responsible for their computer.
- **Laptop Damage** Students are responsible for repair charges on damaged laptops not covered by the manufacturer's warranty or the manufacturer's Accidental Damage Protection warranty.
- **Should I Insure?** We highly recommend that students insure their laptop above and beyond the Accidental Damage Protection (ADP) warranty against theft, loss or damage. This can usually be done by adding a rider on a homeowner's/renter's policy.

Questions? Contact our Information Technology Department at 605.882.5284 ext. 280 or email Service.Desk@lakeareatech.edu. For specific program-related laptop questions, please contact your program supervisor.
